

THERMOLEC

ELECTRIC BOILER

The Latest In Technology for

HYDRONIC HEATING

Standard Features

Fully Modulating

- Ideal for multiple zone systems
- 15% energy savings versus staged boilers

Outdoor Sensor and Reset Control

- Adjusts water temperature based on outdoor temperature to maximize efficiency and comfort

Electronic Aquastat

- Precise supply water temperature control
- Designed for radiant floor or baseboard systems

Stainless Steel Tank

- Durable, corrosion-resistant heat generator vessel

Wide Range of kW Sizes Available

- 5 - 40 kW, up to 136,500 BTU output

Compact and Lightweight Design

- Maximum 18" x 28" x 9-1/2"
- 62 pounds

Thermolec Electric Boiler Features

- Electronic Controller Function**
 - Full modulation: maximizes heating efficiency for precise control of output water temperature.
 - Aquastat: fully adjustable hi/low water temperature settings.
 - Reset control: varies water temperature based on signal from outdoor sensor.
 - Load Management Control**
 - Automatically controls boiler based on utility control.
 - Insulated Stainless Steel Heat Generator Tank**
 - Corrosion-resistant for long life.
 - Solid State Control Relays**
 - Silent, long-lasting control of element switching.
 - No mechanical parts to wear out.
 - High-Limit Protection**
 - Built-in safety feature.
 - Optional Circuit Breakers**
 - Provides safe electrical isolation for service.
- Two Models Available
- Mono for stand-alone electric heating.
 - Dual-energy models for electric with fossil fuel backup boiler applications.

Outdoor Sensor and Supply Water Temperature Reset

The outdoor reset control proportionally varies the hot water temperature when the outdoor temperature is between -10°C and +10°C. The result is improved comfort and energy savings on mild days.

Typical Installation

Dual-Energy Features

- Dual Fuel Control Switch**
 - Allows for manual selection between gas/oil or electric boiler and automatically switches based on utility company's load management signal.
- Diverting Valve Relay**
 - Automatically diverts waterflow to selected boiler based on load management control.

Specifications @ 240v / 1ph

Dimensions

5 - 23 kW: 18" x 18" x 9.5"
 27 - 40 kW: 18" x 28" x 9.5"

Limited Warranty

10 years on elements and tank, 2 years on all other components.
